## 12 Reasons Why Centenary Kits lead the market in Colorbond Steel DIY Pergola Kits

### 1. Visual Outcome

Centenary Kits have the best visual appeal of all DIY Pergola Kits. Sturdy and Stylish with a large range of colours and designs the Premium Grade [Centenary range of DIY Kits](#) will add value and living space to your home. All kits come with complete instructions to assist with your installation and engineering for your building permit.

### 2. Engineering

The product is engineered for strength with plus engineering supplied for every purchase for your permit application. Centenary projects can be engineered for commercial projects such as schools, sporting clubs, council projects and the like. This extra almost hidden benefit ensures that your project is "engineered to last".

### 3. Colour Options

Centenary provides Australia's largest standard colour option range. Beams and Rafters are gloss Colorbond and also feature powder coated external steel brackets and components which make installation easier and appealing. Special Feature: Beams and associated products can be \*powder coated to order providing endless colour options (*\* an optional extra costs do apply*)

### 4. Roofing

The Roof range is extremely flexible in its design allowing for various roofing options and colours including double sided gloss, fibreglass and polycarbonate skylights options plus a full Colorbond range of colours and guttering profiles for your rainwater product. All kits include downpipes.

### 5. Strength & Spans

Spans between posts and gable width are the best in the business. Gables structures up to 12 meters wide are possible without internal cross beams. This is due to larger beam sizes, improved profile and connector designs providing strength plus visual appeal. These benefits not only reduce product clutter but also are perfect for big projects in schools and sporting clubs for large shelter and entertainment areas.

### 6. Design Styles

Free-standing or Attached to another structure.

- Gable include – freespan, Dutch, Hip styles
- Curved Roofs
- Flats Roofed
- Insulated Roofing

Frankly, there are many options including mix and match styles together.

---

Design Cont'd...

Our Kits are extremely flexible and can be made for most full, semi attached or free standing locations.

So we know under most situations we have a kit solution for you and Totally Outdoors has the experience to ensure your kit configured correctly.

### 7. Connections

**To Ground:** All Centenary Kits provide galvanised stirrups for above ground or in-ground situations.

**Note:** *We do not place posts directly into ground, as Colorbond is not warrantied for constant ground or in ground contact.*

**To Dwelling** – connectors and fasteners are provided to all Kits. So when advising your measurements we will need to know if attaching to another structure such as your home.

**To Beams and Post** – all connector's coloured steel or powder coated to maintain same exact colour. *No need for plastic infill's or corners inserts to hide design imperfections and gaps.*

*We simply don't cut corners such as other manufacturers we also provide connectors for attachment to another structure when required.*

*The following items are not included in Kits*

- *Concrete – for in-ground stirrups (Stirrups included)*
- *Dyna Bolts for bolt down and masonry connections.*
- *Storm water pipe and connectors*

### 8. Warranty - 20 Year Manufacturer

Fielders Centenary as part of Hills Industries provide Australia's best manufacturer's warranty backed by over a 100 years of servicing Australians.

A company with a proven history to trust when considering your project supplier.

(See supplier section for more information on warranty and suppliers - [here](#))

### 9. Performance

Fielders Centenary has designed into their Steel Kits proven design and superior performance products. Two piece beams and posts provide less deflection and greater stability.

We understand building your Pergola or Verandah is a long term project. Centenary DIY Pergola Kit's tick all the right boxes in product quality, performance and company reliability.

Built to last by Australians for Australian conditions with an industry leading manufacturers 20 year warranty.

## 10. Distributors

Totally Outdoors as an Authorised Premium Centenary Distributor has the training, product knowledge, building and construction experience to get you started.

You're dealing with people who know what and how to get the best result for your project. Why - because it's what we do.

No, we don't build it for your (when purchasing a DIY Kit all building clients care although installation can be arranged in Metro Melbourne) but we can assist to provide the information you need for you to "Do it Yourself".

*(Note: Melbourne Metro we provide a \$250 on-site check measuring site inspection service when a purchase has been made – if required).*

### **Totally Outdoors Display Centre**

Totally Outdoors provides an undercover Display Centre for clients to touch and feel our products prior to purchasing.

Displays do show Centenary, Solarspan and Eclipse products along with DeckStar decking.

Reviewing products prior to commencing building is recommended and our undercover display centre helps client visualize the outcome of their project.

### **Opening Hours:**

Monday to Friday: 9.00am to 4.30pm

Saturday: by appointment only.

### **Location:**

Factory 1 - 26/28 Abbott Road Hallam - check out our Display Centre [here](#)

### **Getting Council / Building Permits**

Under most situations a Building permit is required.

Checking with your local council or a building surveyor should be undertaken to confirm this and any other council requirements if applicable.

We can assist with recommending a drafting person or a building surveyor for obtaining building permits - Melbourne Metro Only.

We do supply engineering with Kit to accompany your building plans and are suitable for inclusion with your site / elevation plans for a building permit.

### **Most situations and designs have been considered.**

Yes, there are many reasons to consider the extra value and performance of a Premium grade *pre-manufactured* Fielders Centenary Pergola Kit.

Even the simple things are covered such as:

- DIY Kits do come with all connection parts and fasteners including touch up paint for you to assemble your project.
- Centenary do provide “how to instructions” with all heir kits.
- Kit’s comes with galvanised stirrups for extra project durability
- All brackets cover joints as No need for plastic fillers to cover poor design outcomes
- Perfect beam and post profiles for easily adding to your patio items such as blinds, handrail or screens.

As you can see there are many more than 10 reasons to consider a Centenary Pergola

### **So if you’re considering a Pergola Kit**

So if you’re considering a Pergola Kit we hope you agree Centenary Pergola Kits and Totally Outdoors might just be and right combination for your project.

See our web site DIY Pergola Kits for instructions on how to measure your project area.

If uncertain please call our office during working hours for further information.

### **On Site Measurements:**

We do note supply free on site measure & quotes for DIY Kits.

If you require a check measure and quote this cost is \$250. (*Available Melbourne Metro Only*)

For general and initial project kit estimate a check measurement not essential.

On Site check measuring might be worth considering when proceeding with purchasing a Kit to ensure measurements and connection requirements are properly configured for your project.
